Extraordinary Healing

How the discoveries of Mirko Beljanski, the world's first
green molecular biologist, can protect and restore your health

by L. Stephen Coles, M.D., Ph.D.

EXTRAORDINARY HEALING documents the extraordinary story of French researcher Mirko Beljanski, known as the father of environmental medicine. Beljanski's discovery of destabilized DNA and the specific plant molecules that can help restore DNA to a healthy state and stop pathological cells from replicating have led to many miraculous cures and prolonged survival for thousands of cancer patients, including French President Francois Mitterrand. Previously well-known only in France (where citizens picketed in the streets to be able to use the same protocols that extended the life of President Mitterrand), Beljanski's protocols are now gaining popularity in the U.S. and are being used by scientists at Columbia University.

L. Stephen Coles, M.D., Ph.D., an expert on supercentenarians—people who live beyond the age of 110—gives an insightful account of the revolutionary approach to prevention and support pioneered by Beljanski, who spent thirty years at the prestigious Pasteur Institute in Paris.

A compelling tale of a courageous and brilliant researcher, *Extraordinary Healing* illuminates the promise of specific, natural plant molecules in the restoration and protection of cellular health. It is a must-read for anyone in the field of cancer research.

L. STEPHEN COLES, M.D., PH.D., is a visiting scholar at the University of California at Los Angeles Department of Computer Science and an Assistant Researcher in the Department of Surgery, David Geffen School of Medicine. He cofounded the Los Angeles Gerontology Research Group in 1990, which has met monthly for nearly 20 years. He is a director of the Supercentenarian Research Foundation. Dr. Coles is the author of 129 scientific papers and holds two patents.

À votre demande, le livre "**Extraordinary Healing**" exclusivement en anglais, vous sera adressé à réception d'une donation minimum de 22 euros (prix coûtant de l'ouvrage plus frais d'expédition).

Les dons que reçoit la Fondation sont très appréciés car ils permettent d'initier de nouvelles études et essais cliniques, utiles à la fois pour la reconnaissance des produits et pour favoriser de nouvelles applications.
